Dutch Hood & Canopy

Standard Awnings.

Amaru's awnings are an extremely effective way to reduce the running costs of air conditioners whilst also reducing glare and fading throughout your home.

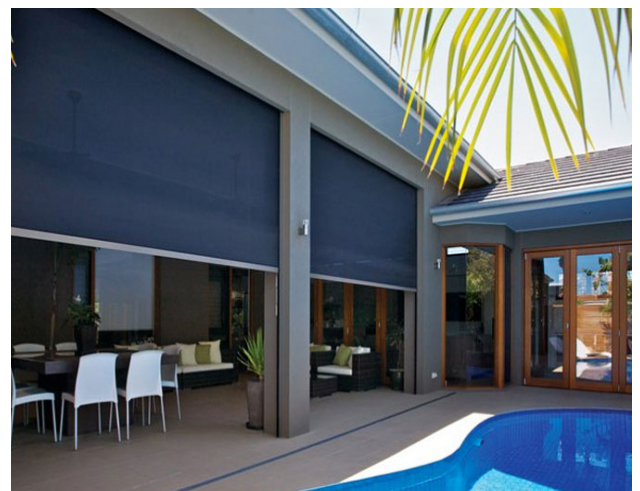

Straight Drop Awnings.

If privacy and light control is important, a straight drop awning is an ideal choice. Straight drop awnings can be used to enclose an area as well as provide shade and protection for windows, balconies and verandahs.

Zip Awnings.

This style is popular for enclosing outdoor areas for alfresco entertaining and offers protection year-round from sun, rain, frost and high winds.

Pivot Arm Awnings.

Projecting outwards at an angle from the top of the opening, pivot arms create an arc that allows air to flow under the fabric. Protecting against our harsh summer sun, these awnings are perfect for almost every window application.

Made locally,
5 year warranty.

Perfect for both
domestic and
commercial
applications.

Retractable Awnings.

Make the most of your outdoor space, enjoy fresh air and alfresco dining whilst being protected from the elements with a retractable folding arm awning. These awnings extend outwards over your space and don't require posts or beams, leaving your entertaining area obstruction free.

Dutch Hood.

Popular for protecting doorways, dutch hoods and canopies offer a functional and elegant solution for shop fronts and commercial properties, as well as homes.

Handy Tip
Can be sign
written.

Pelmet Head Box

Fully enclose the fabric and roller with a colour coordinated pelmet head box. Use standard colours or powder coat to suit your home.

UV Resistant

With a large variety of UV resistant fabrics available, your home or business will be protected from the harsh Australian elements.

Motorisation

Almost every awning in our range can be motorised, providing you with a luxury experience. The perfect solution for second storey windows.
