Sheer Curtains.

Timeless and elegant, the lightweight fabric of a sheer curtain can create a designer look in any room whilst allowing plenty of natural light to flow in.

Amaru's range extends from exclusive designs to almost everything the industry has to offer, including modern colours, linens, plain fabrics and patterns.

Handy Tip

Choose a sheer in a complementary colour to soften the look of the blackout blind.

WOW!

Floor-to-ceiling curtains create the illusion of more space.

Soft Fold Curtains.

S-fold curtains drape in elegant waves and will bring a luxurious touch to your home. They are well suited to tracks that fit to ceiling height and can be curved to accommodate bends. A popular choice for bedrooms, dining areas and your home theatre.

Drapes.

Drapes can help set the tone for any room in your home. Our huge range of fabrics are sure to complement your existing décor and colour scheme, giving you a beautiful and soft designer look.

Handy Tip

Complement your drapes with a co-ordinating sheer colour.

Hand made
Australian quality.

Soft Romans.

Similar to roman blinds, this style is made from curtain fabrics that are fully lined. Their beautiful soft folds drape between the battens for a formal designer look.

Home Theatre Curtains.

Recreate that authentic cinema experience at home with drapes that improve noise, sound and picture quality. Take it one step further and motorise your curtains to be the envy of family and friends. This can be done through mains power or batteries.

Smart Idea
Control multiple
curtains with one
remote or via your
smart phone!

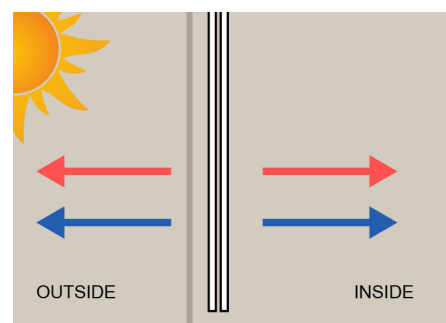

Motorised Curtains

Operate your curtains at the push of a button. Our entire curtain range can be motorised, so you can choose the style you love.

Tracks and Accessories

We have tracks, poles, tie backs and hardware to suit every window, in every home. These accessories complete your look, allowing you to add a decorative touch.

Improved Insulation

Don't let heavy fabric fool you! Insulating properties go both ways by keeping the heat in during winter and out during summer.
